EXPERIENCE

CONSULTANT, DATA SPECIALIST
QUANTUM ANALYTICS MEXICO
MAY 2020 – Current

As a specialist in finance, data analysis, and IT asset management at “Tailored Made” Business Consultancy, I leverage over three years of experience to empower a select group of companies.

My role involves financial forecasting, strategic data-driven decision-making, and optimizing IT assets to enhance efficiency, customer experiences, and risk management.

Our expert team ensures the execution of informed decisions, driving success and sustainable growth.

MANAGEMENT ASSISTANT
FLORIDA POWER & LIGHT
JUL 2021 – JUL 2023, REMOTE

Experienced IT Asset Manager with a strong understanding of IT asset management and purchasing logistics within a large-scale energy U.S.A. company.

Committed to ethical practices and the safeguarding of sensitive information.

Proven track record in developing and maintaining dynamic training programs for IT Asset Managers, covering key aspects of IT Asset Management, compliance, and best practices.

Proficient in various software and tools, such as ServiceNow, JIRA Assets and Zoho Asset Management.

Implementations on ISO 55001 and ISO 19770 standards to enhance asset management efficiency and compliance.

EXPERIENCE

MANAGEMENT ASSISTANT (PART 2) FLORIDA POWER & LIGHT JUL 2021 – JUL 2023, REMOTE

IT Asset Manager:

Led a team of 5 to achieve 100% compliance in software asset management, reducing the risk of license fines and penalties by 80%.

Implemented ITIL and ISO 19770 asset management best practices, resulting in a 45% annual reduction in excess software purchases. Developed and executed data cleansing activities, enhancing data integrity by 60% and enabling more accurate asset reporting.

Cost Optimization: Managed IT asset lifecycle to optimize utilization and value, leading to a 30% decrease in technology expenditure.

IT Asset Analyst:

Streamlined data input process for asset tracking, improving data accuracy by 40%. Facilitated and maintained accurate and compatible asset database, supporting business departments in strategic decision-making.

Conducted comprehensive audits of IT equipment, assuring 99% accountability of all assets. Focused coursework in IT, Operations Management, and Data Analysis.

Purchasing Management: Assisted in executing purchase requisitions, supervising stock levels of equipment and tools, and determining purchase needs based on business requirements.

Order Tracking: Ensured adherence to purchasing logistics by tracking orders and supervising the logistics of purchase deliveries.

Asset Withdrawals & Renewals: Managed the withdrawal and renewal of assets, including computer equipment and hardware. Oversaw technical channeling for repairs to recycling based on the equipment's ability to meet the company's Cyber Security demands.

Ethics & Confidentiality: Upheld respect, ethics, and honesty in safeguarding user information across all levels, from administrative to full energy production and scientific research projects.

EXPERIENCE

DATA ENGINEER NIPPON TELEGRAPH AND TELEPHONE MAY 2019 - JULY 2021 CULIACAN, MEXICO

Strong ability to provide comprehensive technical support, from server assembly to workstation solutions, on behalf of a Danish company.

Technical Support: Provided personalized and world-class support to companies receiving any type of technical support from Dell EMC.

Server Assembly & Workstation Solutions: Handled tasks ranging from server assembly to simple workstation solutions, networks, and any type of activity working under a domain network managed by Nippon Telegraph and Telephone.

IT Asset Management: Oversaw the lifecycle of IT assets, ensuring efficient deployment, utilization, maintenance, and disposal to optimize performance and cost-efficiency.

Ethics & Confidentiality: Upheld the precepts of respect and honesty in handling user information across all equipment. Managed equipment mostly used in scientific research projects, ensuring the safeguarding of sensitive information.

IT MANAGER CALIENTE CASINO AUGUST 2014 - AUGUST 2015 CULIACAN, MEXICO

Strong skills in managing IT resources, warehouse management, and cost analysis. Ability to perform under high commercial demand.

IT Asset Management: Implemented and maintained meticulous IT asset tracking systems to monitor hardware and software inventory.

IT Resource Management: Managed all IT resources of the company, including planning and installation of projects, coordinating maintenance strategies, and providing support.

Warehouse Management: Controlled the regional warehouse of consumables and spare parts, and handled national shipments.

Purchasing & Cost Analysis: Responsible for purchases and cost analysis of materials and devices required for proper maintenance and control of systems.

EXPERIENCE

IT SUPPORT ENGINEER
CALIENTE CASINO
MAY 2011 - MAY 2014
CULIACAN, MEXICO

Wide range of skills from structured cabling to equipment diagnosis and maintenance. Ability to provide high-quality technical support and commitment to service excellence.

Structured Cabling: Supervised and prepared structured cabling for the company's network infrastructure.

Equipment Diagnosis & Maintenance: Diagnosed faults in computer equipment, performed preventive maintenance, and supervised the assembly of computer equipment and all hardware.

Inventory & Warehouse Control: Managed inventory and warehouse control.

Technical Support & Training: Provided personalized, high-quality technical support and training in the use of software and hardware required in the company.

Maintenance Plans & Equipment Review: Monitored maintenance plans, reviewed, and diagnosed terminals in casinos such as Bally, IGT, Williams, Global Draw, Ainsworth, Shuffle Master among others.

AT&T IT CERTIFIED TECHNICAL SUPPORT
GRUPO TÉCNICO DE SERVICIOS TELVISTA
OCT 2010 - MAY 2011
MEXICALI, MEXICO

Strong skills in customer assistance, technical support, and training. Committed to quality and customer satisfaction.

Customer Assistance & Training: Assisted and trained AT&T customers in resolving Internet connectivity problems in a Call Center via telephone. Guided customers in modifying the computer's operating system, local network, or wireless networks, and addressed any connectivity issues that hindered Internet access.

Technical Support: Provided technical support to ensure full operation of the terminal and identified faults in the installation of the local network.

Computer Training: Trained clients with low knowledge in the use of computers.

Customer Satisfaction: Worked with a high sense of quality and aimed for 100% customer satisfaction.

Geographical Coverage: Provided technical support to AT&T customers from 13 states in the United States of America.

EXPERIENCE

PROCESS AND QUALITY ENGINEER
MM INDUSTRIAL S.A. DE C.V.
NOV 2008 - NOV 2009
LOS MOCHIS, MEXICO

Strong skills as a process and quality engineer analyzing and, subsequently, modifying the production process, as well as the quality control system until obtaining the tolerance parameters required by the manuals created based on the highest standards demanded by the end consumer.

Management: the production process was carried out, achieving the established quality goals, as well as the adherence to production standards to make the highest percentage of product deliveries to the finished product warehouse without exceeding the tolerance limits of overproduction or losses.

Catalog Development: the creation of our product catalog, I transformed it into a comprehensive quality control manual, complemented by exhaustive documentation of our manufacturing processes, resulting in the development of our Production Manual, serving as the keystone of our standardized production procedures.

Quality Assurance Framework: I implemented a robust quality assurance regimen, meticulously scrutinizing raw material inputs from diverse suppliers to discern optimal selections based on comprehensive assessments of quality, performance, and cost-effectiveness. Moreover, I oversaw logistical operations of both raw material and finished goods warehouses, ensuring seamless inventory management and timely distribution.
